

5 October 2020

Lab 1

Part 1

- Not every row has an entry for “user name”
- Not every row has an entry for “user tags”
- Inconsistent entry types for “followers”; need to stick with all number values or names of followers, but not both
- Inconsistent entry types for “stream date”; need to specify one date value type, such as DD/MM/YYY or MM/DD/YYYY
- Not every row has an entry for “stream date”
- Inconsistent entry types for “video duration”; need to specify one data value type, such as all minutes, h:m, or h:m:s as well as if the label needs to be included (“h” after the hours and “m” after minutes”)
- Not every row has an entry for “video duration”
- Not every row has an entry for “file location”

Part 2

Lab 01
