Lab 10

Part 1

23

24
1. It knew the user login ID because I had that user's information selected, which meant I was modifying that user's data only. It set the timestamp to the date/time I entered the information.
2. It knew to connect the user ID and user login form because I established that relationship.
3. Pros: It is easy to integrate data and it is easier/more user friendly for importing/changing data.
   Cons: All the data is saved into a single file and there can be security concerns.
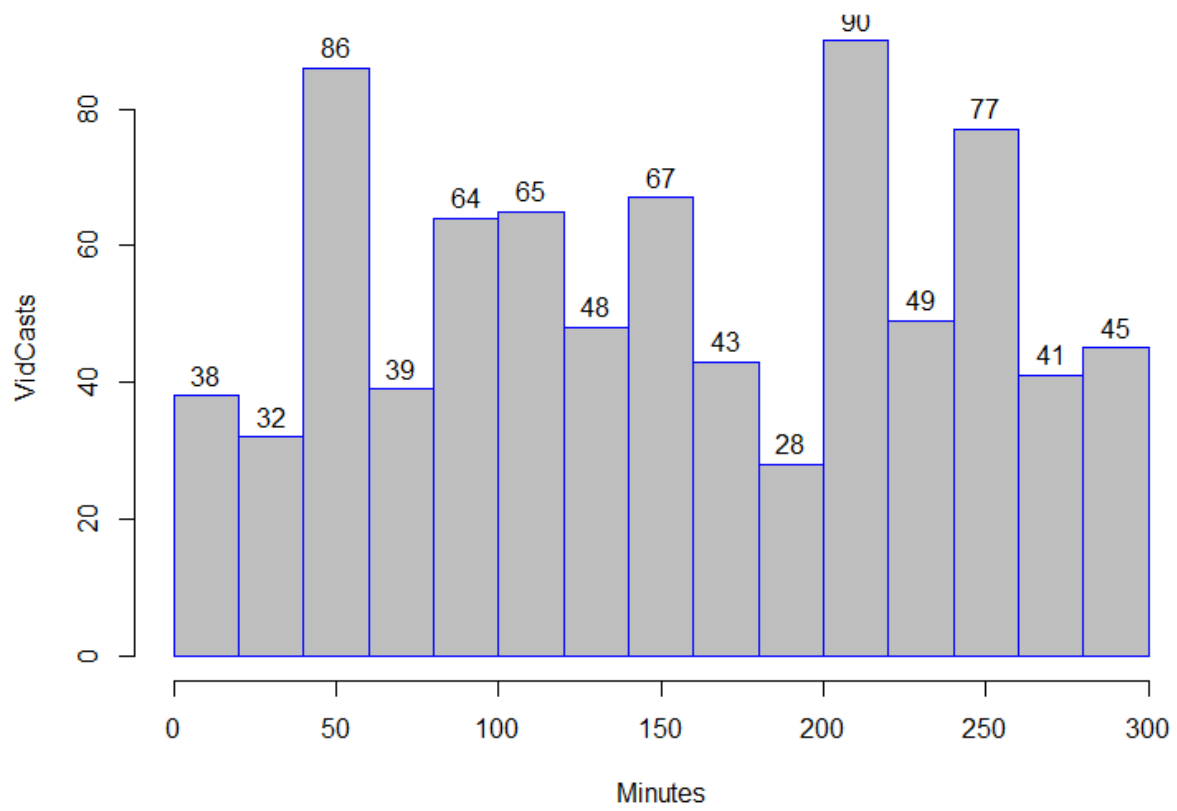

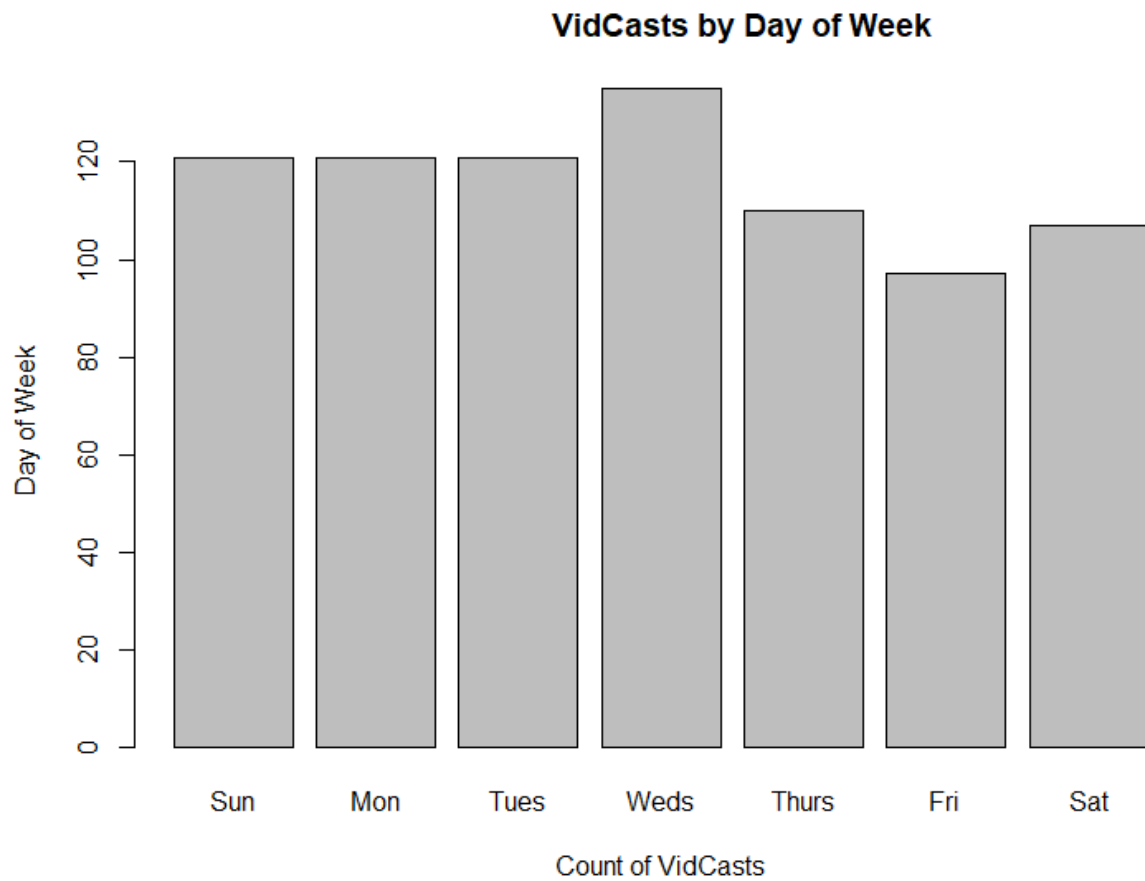

Part 2

	vc_VidCastID	VidCastTitle	StartDayOfWeek	ActualDuration	ScheduleDurationMinutes	vc_UserID	UserName
1	1	Spiders Of Technology	7	245	35	34	program

Showing 1 to 21 of 812 entries, 7 total columns

How long are the VidCasts?

VidCasts by Day of Week

14

1. It looks like it converts the start date of the vidcast to the day of the week the vidcast started on.
2. Create a stored procedure and run that instead.
